

Dri-Dye Check Strips

Features

- For performance verification of microstrip and microplate readers.
- Monitors calibration, linearity, and repeatability of microstrip and plate readers.
- Long shelf life at room temperature.
- NIST traceable absorbance calibration.
- Simply add water, read and compare results to pre-determined acceptance criteria.
- Calibration charts, linearity plots and repeatability records are all included.
- Simulates true test conditions better than neutral density filter by providing information about filtering capacity.
- Wavelengths available 405, 450, and 492.
- Set comes with six, prefilled strips per kit, and reusable strip tray included for use with plate readers.
