

Moticam 2300

Motic's newest Instant Digital Microscopy camera offers a whopping 3 Megapixel live resolution.

Description

The Moticam 2300 is a high-resolution live imaging microscopy camera.

On-chip software image enhancements include Noise-Reduction, Live Filtering and Settings Memory providing a constant environment for comparison work.

Motic Images Plus is an imaging suite included for both PC and Macintosh OSX platforms providing measurement, analysis and sharing tools for teachers, students and researchers alike.

With all necessary accessories included, the Moticam 2300 fits virtually any Microscope's eyepiece therefore allowing you to turn any microscope into a Digital Microscope. As an additional option, the Moticam 2000 package includes a B&S adapter to fit the camera directly into the microscope's Eyetube therefore eliminating one lens assembly.

Moticam 2300
